

AI & DIGITAL CONSULTING · AFRICA AND EUROPE

Digital front desks for embassies, institutions and companies.

Fewer queues, fewer repeated phone calls, complete files. Online booking, a multilingual assistant and clear information, live in 30 days.

30 days
from your content to a live service

24/7
answers from information you have approved

5 languages
English, French, Portuguese, Spanish, Italian. Others on request

100%
domain, hosting and data in your name

THE PROBLEM WE REMOVE

Your team spends its day on work a system could do.

- Queues at the counter and visitors who come back because a document was missing.
- Phones and WhatsApp ringing with the same ten questions.
- Requests lost between email, paper and personal phones.
- A website that is outdated, slow, or simply offline, so partners find nothing.

THE NUMBERS BEHIND IT

1 in 3
African embassy and consulate websites we checked showed visitors an error page, a login wall or a hijacked page[1]

97%
of people read online reviews before choosing a local business[2]

416 M
mobile internet users in Africa in 2024, 576 M expected by 2030[3]

156th
Angola's rank of 193 in the UN e-government index; Nigeria is 144th[4]

[1] MenteAI check of 55 mission websites, Sept–Oct 2026 (21 of 55). [2] BrightLocal, Local Consumer Review Survey 2026. [3] GSMA, The Mobile Economy Africa 2025. [4] UN DESA, E-Government Survey 2024.

WHAT WE PUT IN PLACE

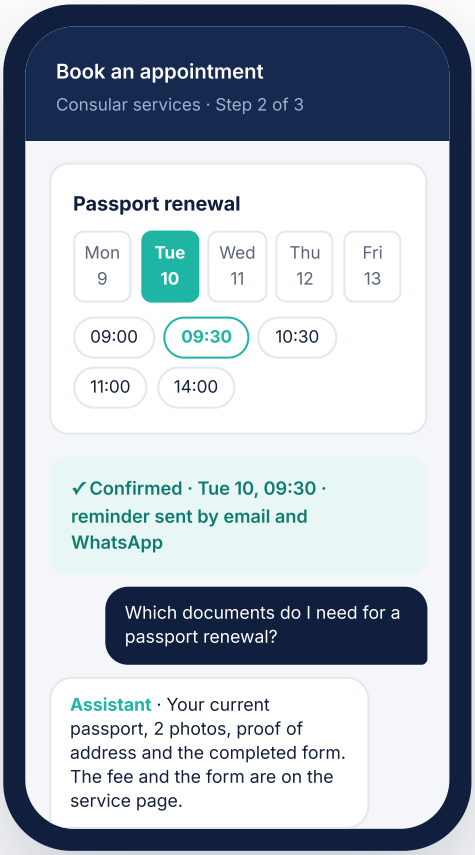

One front desk, open day and night.

Online booking
Appointments, quote or venue requests online, with automatic confirmation and reminders. No more queue at 7 a.m.

Multilingual assistant
Answers frequent questions in English, French and Portuguese, only from your approved information. Sensitive cases go to your staff.

Clear procedures
One page per service: documents required, fees, delays and forms. Visitors arrive with a complete file.

Automation and figures
Every request tracked in one place, follow-ups automated, and a short monthly report: bookings, questions answered, time saved.

SELECTED WORK

Real projects, live today.

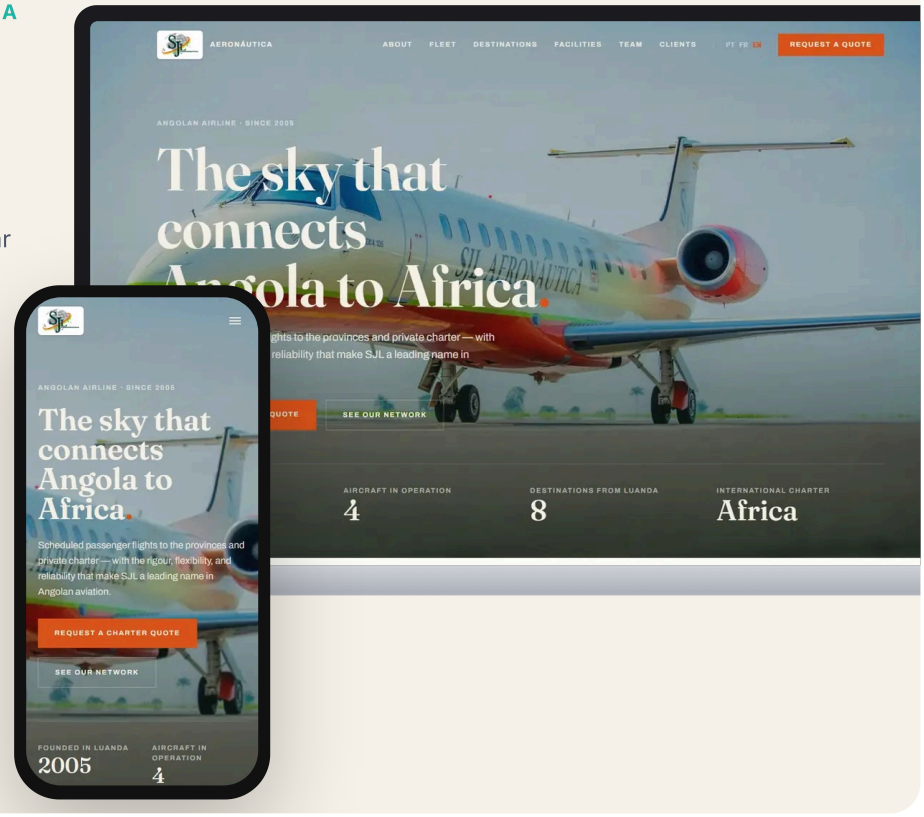

We build for institutions and owner-led companies that need to look as serious online as they are in person.

COMPANY · LUANDA, ANGOLA

S.J.L. Aeronáutica

Private airline flying passengers and charters since 2005. A corporate site in three languages that presents the fleet, the hangar and the network, and turns visits into charter quote requests.

EN · FR · PT · Quote requests · Fleet pages · Mobile-first

DIPLOMATIC MISSION · AFRICA

Consular portal, built in 30 days

Official site with one page per consular service, online appointments and an assistant answering citizens in two languages. Live since April 2026.

30 days to go live

6 consular services online

2 languages

IN PREPARATION

More missions, one platform

Further consular portals are being prepared for diplomatic missions in Africa, on the same proven platform: faster delivery and the same quality for every mission.

2 new missions in preparation

1 shared, secure platform

Your own domain and email

A professional address instead of a free mailbox, with security and auto-renewal.

Google Maps and WhatsApp Business

Correct address, hours and quick replies, connected to the site.

Fast on any connection

Mobile-first pages that load quickly, even on slow networks.

Institutional clients are not named in our documents. References and live demonstrations are shared privately, on a call, with our clients' consent.

HOW WE WORK

Diagnosis first. Then 30 days to go live.

1

WEEK 1

Diagnostic

We map how requests arrive, where staff time goes, and the two or three changes with the most impact. You keep the written findings.

2

WEEKS 2 TO 5

Build and train

We write the content from your documents, set everything up, and train your team in one session. A progress update every week.

3

EVERY MONTH

Run and improve

Hosting, security and updates, plus a short report: bookings, questions answered, time saved.

FOUNDER-LED

Jordan Muela

Founder & Managing Director, MenteAI

Years of building digital products and B2B integration (EDI) for companies in Europe. Works with clients in Portuguese, French, English, Spanish and Italian, between Porto and Africa.

Every project is led personally, from the diagnostic to the launch, with a partner on the ground in Abidjan.

> “Technology only matters if your visitors queue less and your team gets its time back.”

Problem first

AI only where it changes the numbers.

Safe to start

Payment in two stages. Nothing goes live before you approve it.

You own it

Domain, hosting, content and data stay in your name.

Registered in the EU

Portuguese company, invoices and bank transfer only.

Let's start with a 20-minute call.

We look at how requests reach you today and show you a live example. If it fits, we prepare a free mockup of your homepage.
